

ROJAS LEÓN RICARDO

SOFTWARE ENGINEERING

Avenida del Paseo #54. Col. Paseo del Sol, 83246,
Hermosillo Sonora

Age: 23 years

Cellphone: 662 278 35 02

E-mail: rrojasleon18@gmail.com

WebPage: <http://ricardorojasl.github.io/>

I'm a person that likes to learn new things. Open to new experiences and always interested on knowing about new technologies. My best virtue's that i can learn from my mistakes and i know that life must go on.

LABORAL EXPERIENCE

Developer ▶

Fitness Sport Gym

I was part of the developer's crew of a desktop system to help a GYM (fitness sports gym, in Hermosillo) getting better control of the clients at the establishment. The software helped to get administrative control as well.

Developer ▶

HLO Supply

I helped to develop a web site for a business called HLO Supply Solutions.

▶ Developer

Universidad de Sonora

I was part of the developer's crew of a web system made at Universidad de Sonora. The client was an Administrative Manager of the Economy department. And the system's goal was to get a better control of the items at stock that the client had.

► Developer

Universidad de Sonora

I developed a web system at the Universidad de Sonora, in the Industrial Engineer department which goal was to follow the whole process of the students that's making the professional stance at an enterprise or business.

► Developer

I worked as a developer for an online survey to help the mining sector in Sonora recruit people. The base for that survey was pure html/css. Events handled by javascript and SQL Server as the DB Manager.

Universidad de Sonora

EDUCATION

► Universidad de Sonora. Unidad Regional Centro

Software Engineering
2011-present

► Centro de Bachillerato Tecnológico Industrial y de Servicios No. 132

Food Technologist
2008-2011

SOFT SKILLS

I'm very responsible, I know how to follow orders, but what I like the most is to learn new things, sometimes by myself and some other times by teachers or someone else with better experience than mine. I'm not afraid of making mistakes as long as I learn from them. Very confident of myself.

HARD SKILLS

- ▶ SQLServer: I Know the basics (DB creating, giving permits to users, create/edit tables and views).
- ▶ JAVA: In the Universidad de Sonora, Java's the base we learn in, but I don't use it too often.
- ▶ C#: Learnt it by myself. I'm hoping to have a certification on C# programming in the future.
- ▶ HTML: In most of my projects, I've used html code as use for my forms and structure of the whole system in progress.
- ▶ JAVASCRIPT: Learnt by myself as a complement to handle html code, such as give some functions to controls.
- ▶ ASP.NET: Started exploring the ASP.NET environment by myself, because I'm interested on web development.
- ▶ ANDROID: I'm interested on mobile apps development, but specifically on android. I don't know much, I've just done some few class projects to learn the basics of this environment
- ▶ ENGLISH (SPEAKING - 90%): My vocabulary on English and pronunciation may not be perfect, but I'm sure I can sustain a conversation in English and being capable of making my point to be known.
- ▶ ENGLISH (WRITTEN – 95%): My written English is better than my speaking. I'm always trying and looking for words to be correct by the time I'm writing in English.
